Parallel Post-Payment Completion

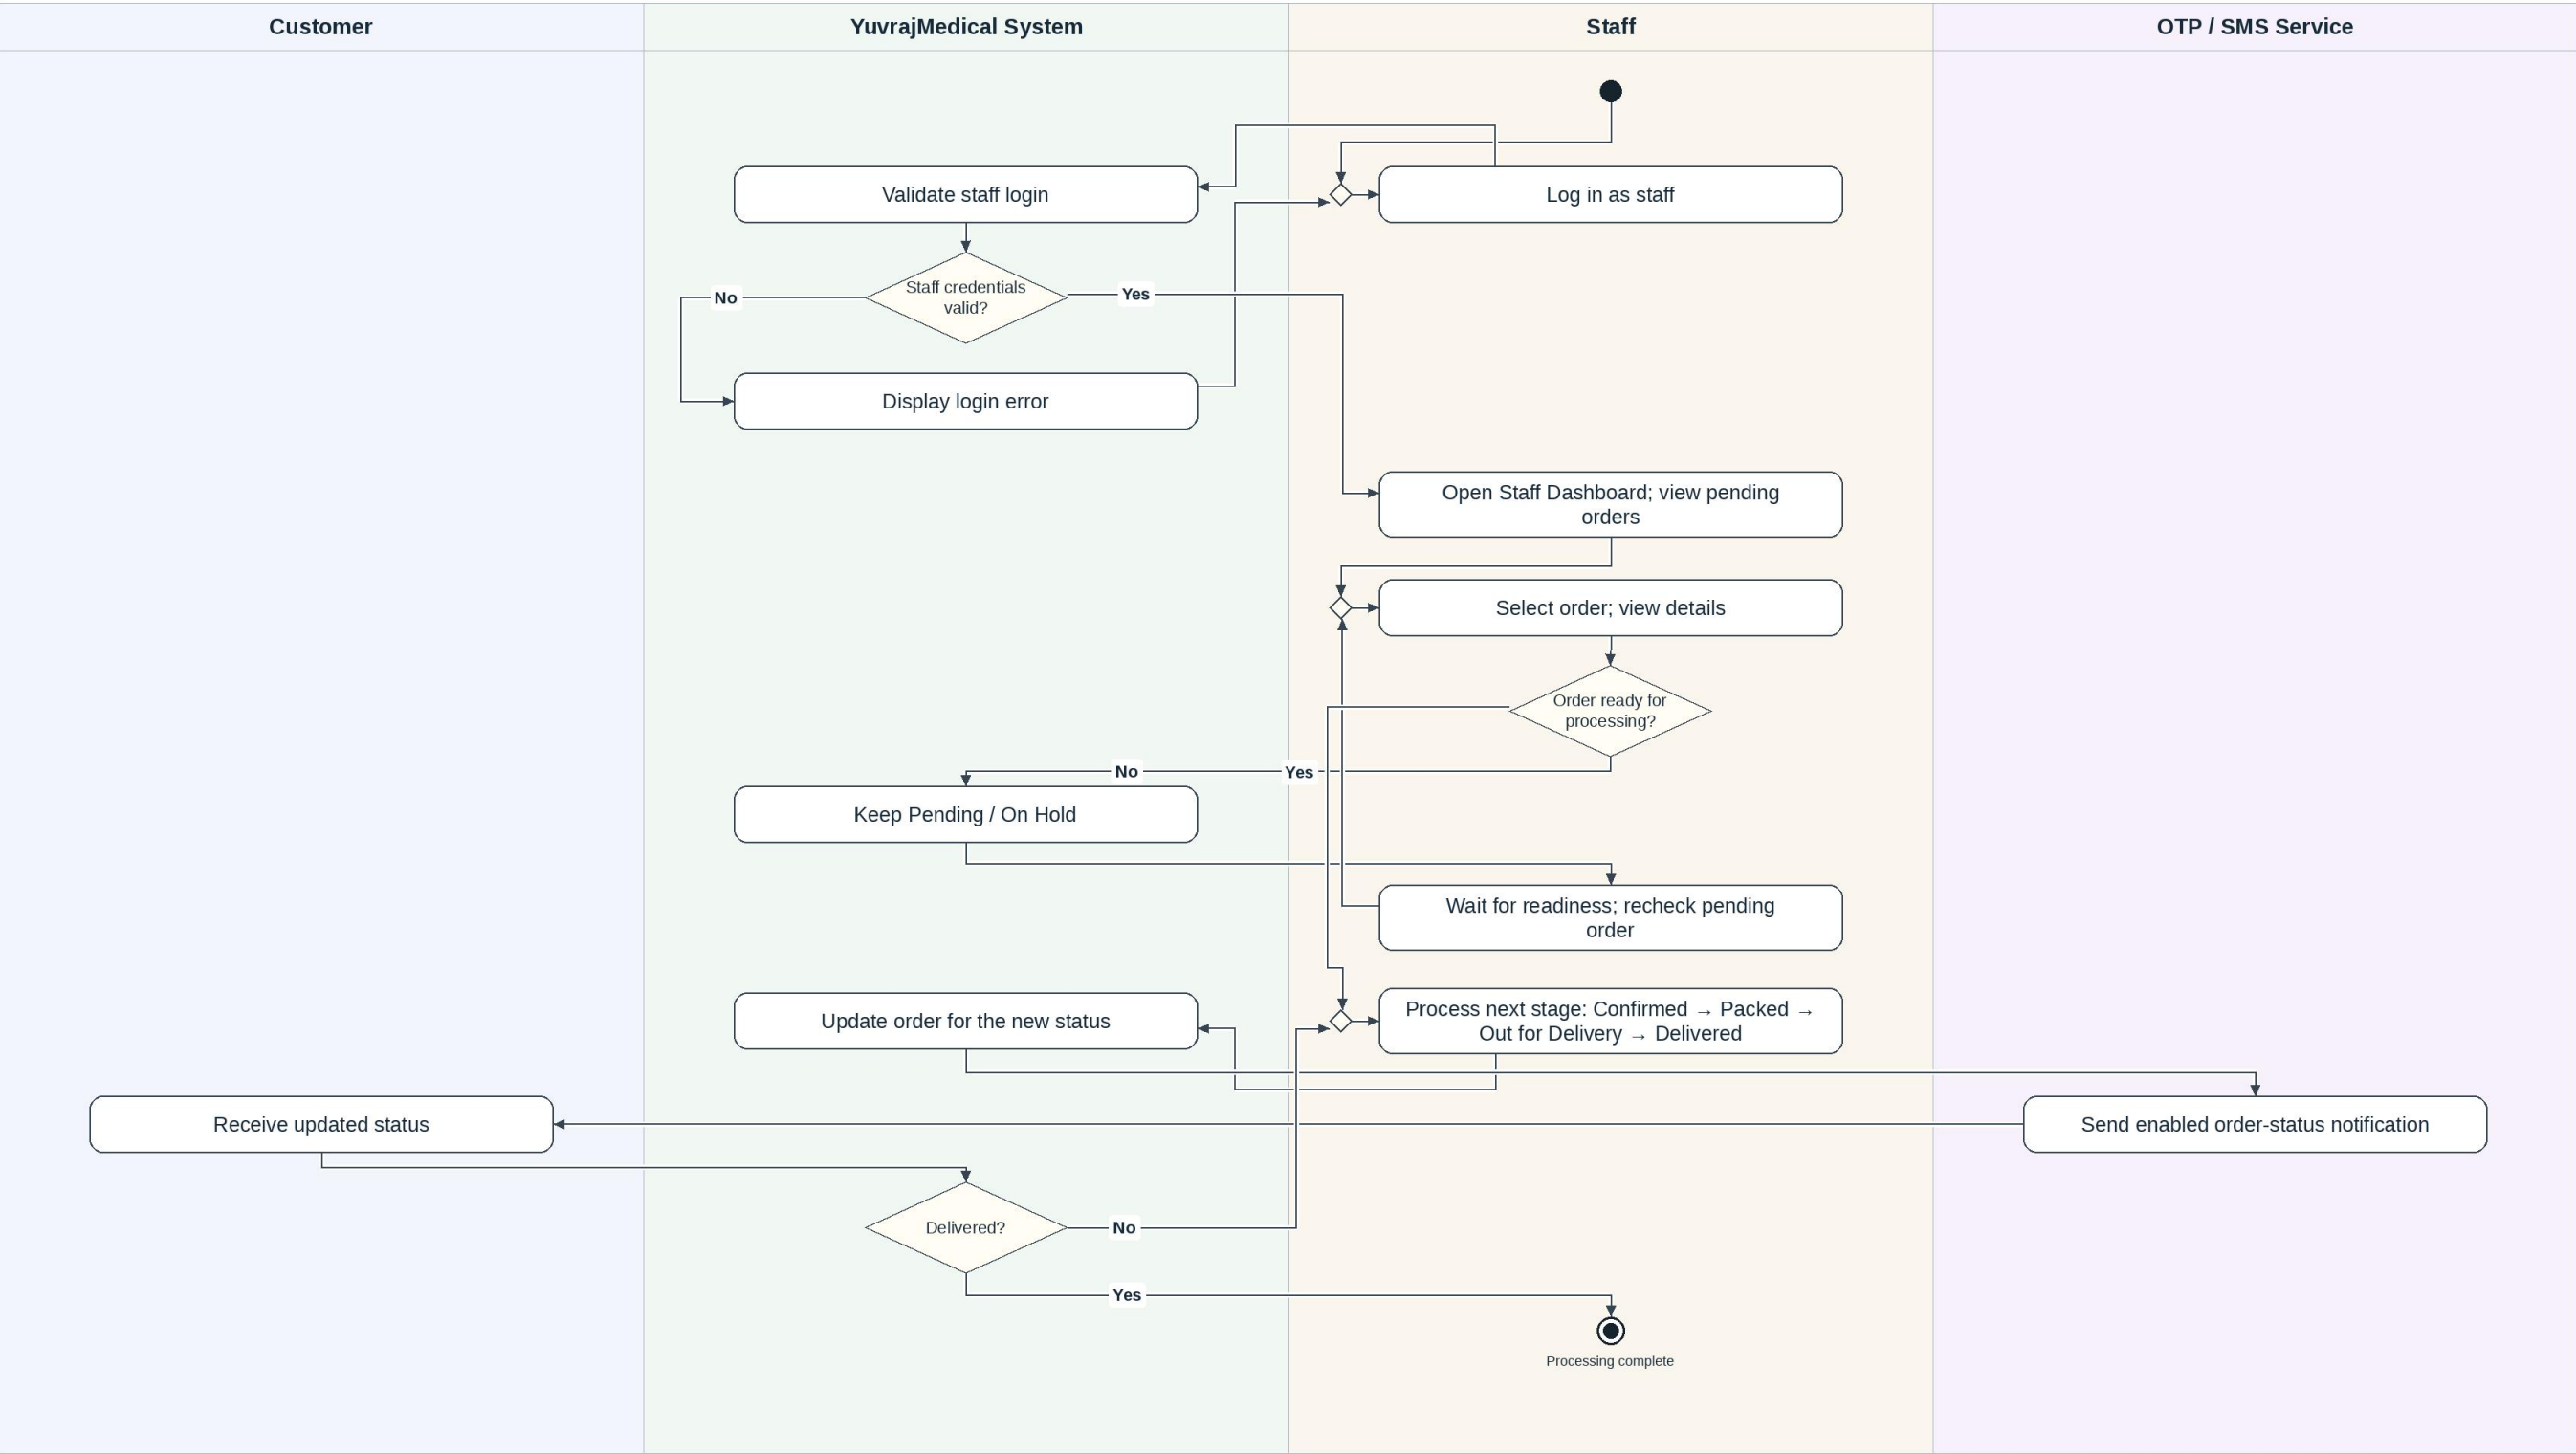

Filled circle: start • Bullseye: end • Diamond: decision / merge • Black bar: fork / join • Arrows: control flow

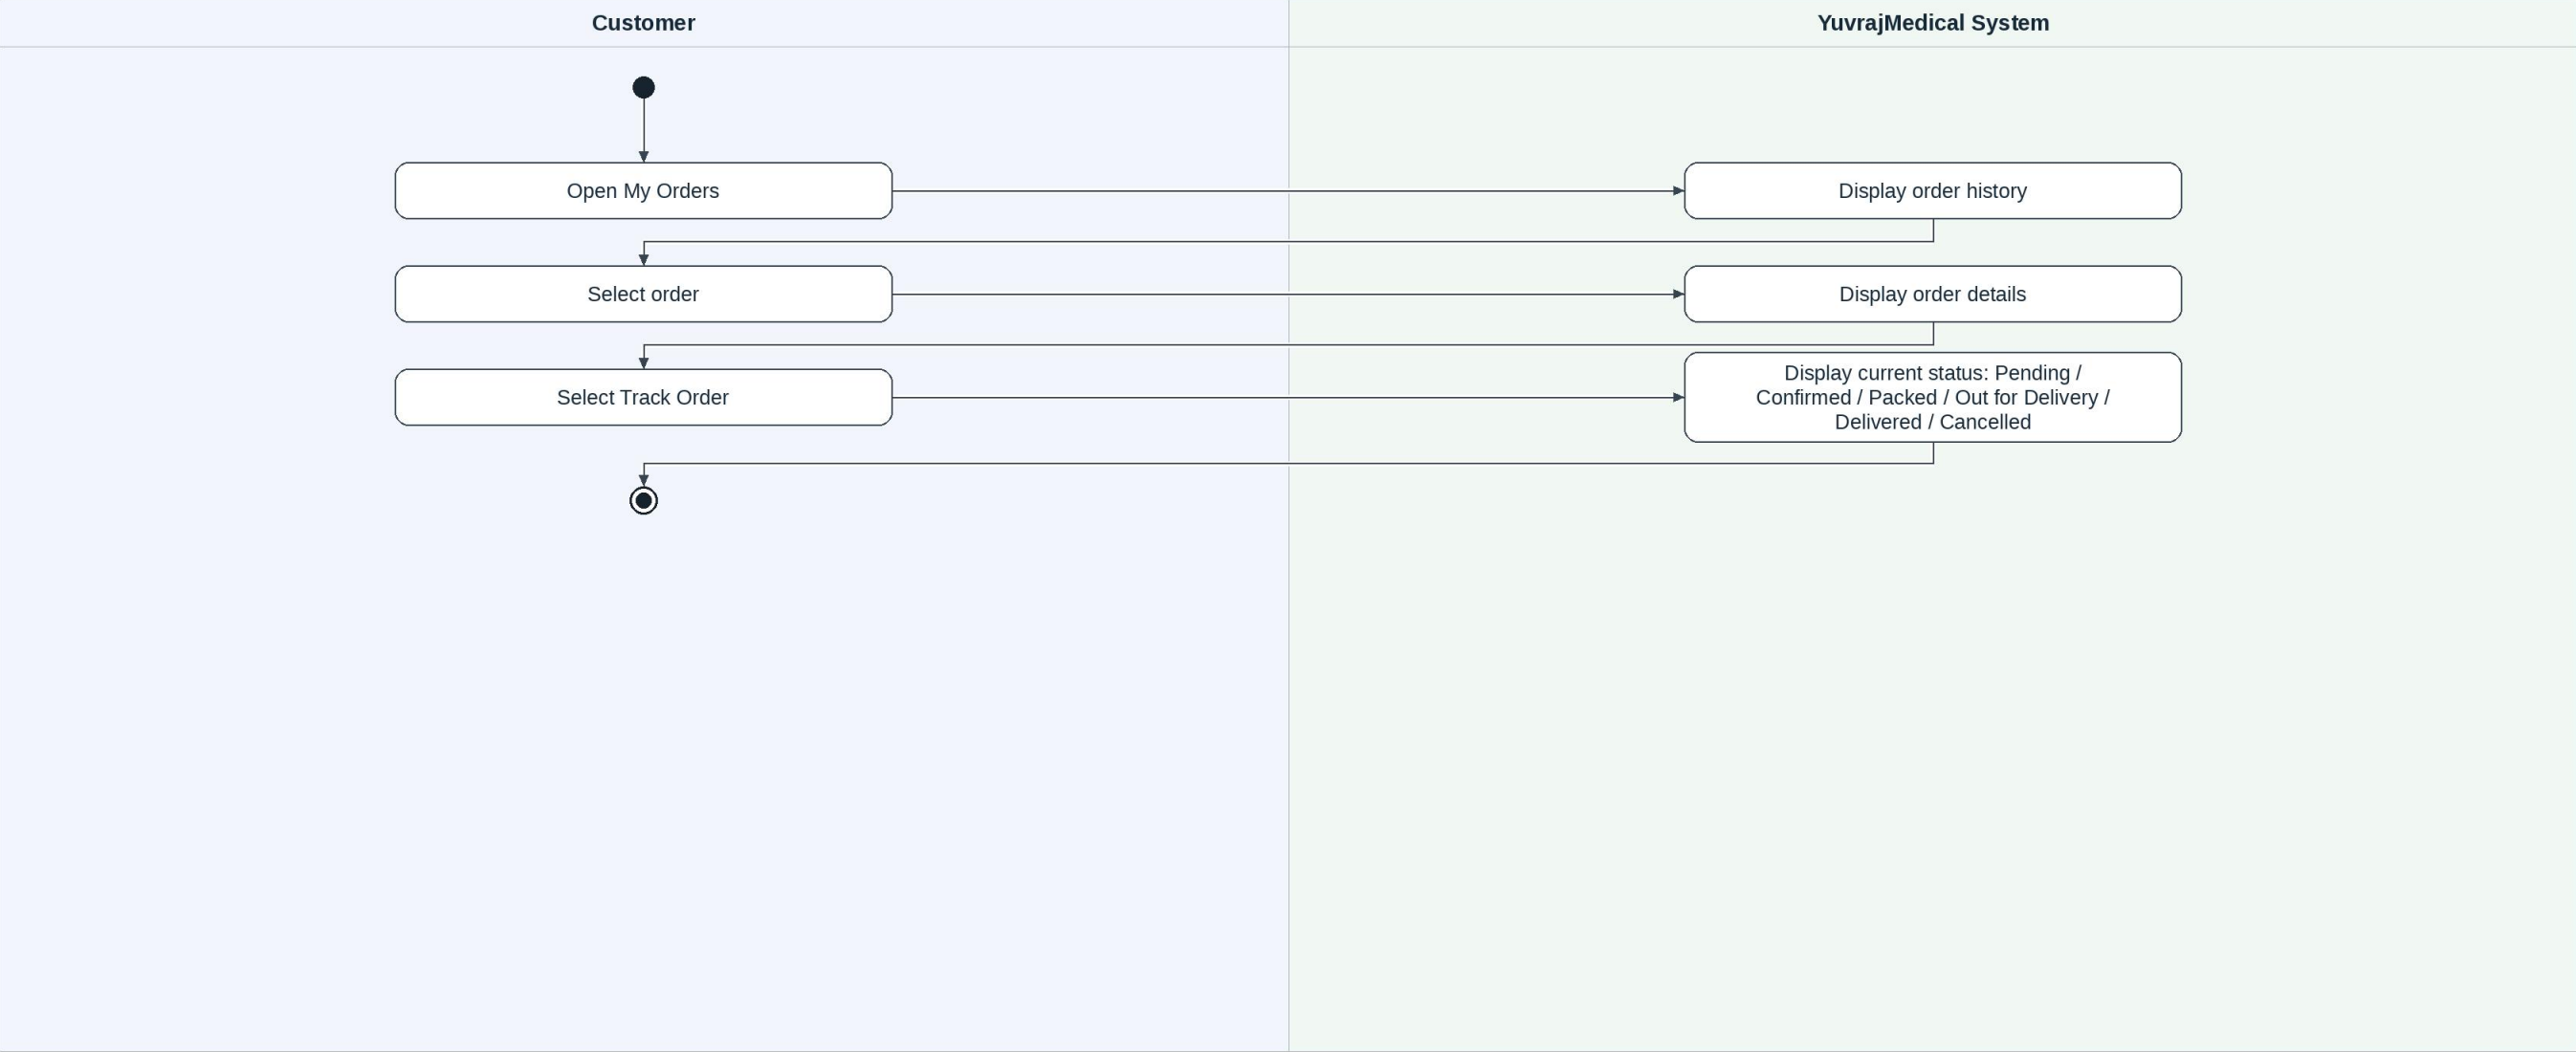

All five fork branches must finish before the join continues. Notification preferences are resolved by the notification workflow.

Notification Preferences & Delivery

Filled circle: start • Bullseye: end • Diamond: decision / merge • Black bar: fork / join • Arrows: control flow
Optional-message preferences do not suppress OTP needed for authentication. Other configured channels follow the same system notification decision.
